PROJECT OF COMMON INTEREST

PRIORITY THEMATIC AREA: SMART ELECTRICAL GRIDS DEPLOYMENT

Public consultation on the SELENA project

Invitation

Dear representatives of cities and municipalities, building authorities, ladies and gentlemen,

We would like to invite you to a public online consultation on the Project of Common Interest SELENA, which contributes to the modernization and strengthening of electricity distribution systems in Central Europe.

The SELENA project is a regional initiative of distribution system operators from the Czech Republic, Hungary, and Slovakia. Its objective is to increase the capacity, flexibility, and interconnection of the system in order to enable the integration of renewable energy sources, support the electrification of the economy, and at the same time ensure reliable, secure, and affordable electricity supply.

The project also makes a significant contribution to strengthening the resilience of critical energy infrastructure and the preparedness of the power system to respond to emerging technological, climate and security challenges.

During the public online consultation, current activities and planned investments of the SELENA project will be presented. Representatives of the project partner distribution companies - Stredoslovenská distribučná, a. s., Východoslovenská distribučná, a. s., and Západoslovenská distribučná, a. s. - will take part in the discussion. The event will also be attended by representatives of the Ministry of Economy of the Slovak Republic, and the Office for Spatial Planning and Construction of the Slovak Republic.

The public online consultation will take place on:

21 April 2026 at 10:00 AM

The event can be followed live on **YouTube**. You may also participate in the discussion and submit questions via the **sli.do** application (code: #SELENA). The live stream and Q&A platform are accessible in one place via scanning the QR code or in the "Public Consultation" section on the project website

www.selena-smartgrid.eu

Participation in the event is free of charge and does not require registration.
